MODULE 9.3 ASSIGNMENT: JAVASCRIPT EXERCISE, PART 1

- Create a new folder under your local csd-340 folder (repository) and name it module-9
- Make a copy of LastName_Mod2_2.html and add it to your module-9 directory. Rename the file to LastName_Mod9_3.html
- Add a link in the index.html file to the new 9.3 HTML file

Hint: Refer back to assignment 4.2 if you are confused about what this item is referencing

- Contents of LastName_Mod9_3.html
- Make sure HTML page title says “CSD 340 Web Development with HTML and CSS”
- Rename the h1 text value to “Assignment 9.3: JavaScript - Part 1”
- Write at least three paragraphs; either a short story about you, or a poem, or movie dialog.. etc.
- Place four tags containing a blank line (underscores) for four words.
- Declare four javascript variables holding the string inputs for these span tags.
- Create a button for each tag that will replace the underscores when selected.
- For this assignment, you are to create and test a page similar to the one shown below.
